[Build Your Baby's First Vocabulary](#) It is important to encourage children's vocabulary development so that they develop the language and literacy skills necessary to succeed in school.

The adults in a child's life play a significant role in helping a child learn new words. A very young baby may only babble in response to hearing your voice as you read, but when you respond back by repeating or expanding on his or her sound or offering a word with that sound, this back-and-forth interaction helps with language development.

The Perspective of Love Jul 23 2022 While many of the Reformers considered natural law unproblematic, many Protestants consider natural law a "Catholic thing," and not persuasive. nature, and overlooks the noetic effects of sin. This "Protestant Prejudice," however strong, overlooks developments in contemporary natural law quite capable and willing to incorporate the usual objections into natural law. While the natural law itself is universal and invariant, theories about the natural law vary widely. The Protestant Prejudice may respond to natural

law understood from within the modes of common sense and classical metaphysics, but largely overlooks contemporary natural law beginning from the first-person account of subjectivity and practical reason. Consequently, the sophisticated thought of John Paul II, Martin Rhonheimer, Germain Grisez, and John Finnis is overlooked. Further, the work of Bernard

Loneragan allows for a natural law admitting of noetic sin, eagerly incorporating grace, community, the limits of history, a real but limited autonomy, and the centrality of Christ in a natural law that is both graced and natural.
