Structures from the Trivium in the Cantar de Mío Cid Oct 01 2019 The medieval poem Cantar de Mio Cid is one of the great works of Spanish literature. Its precise date is uncertain, and its author has never been identified. Some scholars believe that it was written by many authors who, over time, adapted earlier material. In this study James Burke considers the authorship of the poem as revealed in key structural components. Placing the Cantar de Mio Cid more in the emerging culture of writing than in the sphere of oral poetry, Burke maintains that the text was produced in a manner typical for the Middle Ages by a writer who followed procedures very specific to the period. Medieval writers were invariably educated in the basic subjects of the trivium: grammatica, rhetorica, and dialectica, taught in the 'middle

schools' of the twelfth century. In the process they acquired techniques that enabled them to rewrite pre-existing materials of an authoritative character, emphasizing themes and ideas important for contemporaries. Burke argues that someone rewrote epic material having to do with the Cid in this way. Referring to a device described by the twelfth-century Spanish philosopher Dominicus Gundissalinus as 'the imaginative, poetic syllogism,' Burke identifies three instances of the device in the *Cantar de Mio Cid*. They support themes and motifs of awakening, manifestation, and revelation, and of the hero as exemplar. This volume sheds new light on a central work in Spanish literature and on medieval poetry in general.

Lincoln's Ladder to the Presidency Oct 05 2022 Throughout his twenty-three-year legal career, Abraham Lincoln spent nearly as much time on the road as an attorney for the Eighth Judicial Circuit as he did in his hometown of Springfield, Illinois. Yet most historians gloss over the time and instead have Lincoln emerge fully formed as a skillful politician in 1858. In this innovative volume, Guy C. Fraker provides the first-ever study of Lincoln's professional and personal home away from home and demonstrates how the Eighth Judicial Circuit and its people propelled Lincoln to the presidency. Each spring and fall, Lincoln traveled to as many as fourteen county seats in the Eighth Judicial Circuit to appear in consecutive court sessions over a ten- to twelve-week period. Fraker describes the people and counties that Lincoln encountered, discusses key cases Lincoln handled, and introduces the important friends he made, friends who eventually formed the team that executed Lincoln's nomination strategy at the Chicago Republican Convention in 1860 and won him the presidential nomination. As Fraker shows, the Eighth Judicial Circuit provided the perfect setting for the growth and ascension of Lincoln. A complete portrait of the sixteenth president depends on a full understanding of his experience on the circuit, and *Lincoln's Ladder to the Presidency* provides that understanding as well as a fresh perspective on the much-studied figure, thus deepening our understanding of the roots of his political influence and acumen. The Frackers Sep 04 2022 "A lively, exciting, and definitely thought-provoking book." —Booklist Things looked grim for American energy in 2006, but a handful of wildcatters were determined to tap massive deposits of oil and gas that giants like Exxon and Chevron had ignored. They risked everything on a new process called fracking. Within a few years, they solved America's dependence on imported energy, triggered a global environmental controversy, and made and lost astonishing fortunes. No one understands the frackers—their ambitions, personalities, and foibles—better than Wall Street Journal reporter Gregory Zuckerman. His exclusive access drives this dramatic narrative, which stretches from

North Dakota to Texas to Wall Street.

The Division of Endocrine Surgery (DES) of the European Board of Surgery has defined the curriculum for Endocrine Surgery to include thyroid, parathyroid, adrenal and GEP-NET surgery, and handles accreditation in Endocrine Surgery. The first examinations in Endocrine Surgery in Europe have been introduced in 2003. The main goal of the exam is to maintain a uniform and high standard of endocrine surgical professionalism across the Europe. This book was completed with the expectation that it would benefit all European

La función profética de la educación teológica evangélica en América Latina Jul 30 2019 La importancia de educar como una función profética es, sin duda, un tema crucial y de máxima actualidad. En un entorno eclesial un tanto caótico y alarmante, donde numerosos autoproclamados

"profetas" con falsas predicciones, doctrinas dudosas y, a veces incluso, conductas cuestionables ponen en entredicho la realidad de ese ministerio bíblico y desacreditan ante el mundo la imagen del verdadero evangelio.
