Forward with Classics Apr 17 2021 Despite their removal from England's National Curriculum in 1988, and claims of elitism, Latin and Greek are increasingly re-entering the 'mainstream' educational arena. Since 2012, there have been more students in state-maintained schools in England studying classical subjects than in independent schools, and the number of schools offering Classics continues to rise in the state-maintained sector. The teaching and learning of Latin and Greek is not, however, confined to the classroom: community-based learning for adults and children is facilitated in newly established regional Classics hubs in evenings and at weekends, in universities as part of outreach, and even in parks and in prisons. This book investigates the motivations of teachers and learners behind the rise of Classics in the classroom and in communities, and explores ways in which knowledge of classical languages is considered valuable for diverse learners in the 21st century. The role of classical languages within the English educational policy landscape is examined, as new possibilities exist for introducing Latin and Greek into school curricula. The state of Classics education internationally is also investigated, with case studies presenting the status quo in policy and practice from Australasia, North America, the rest of Europe and worldwide. The priorities for the future of Classics education in these diverse locations are compared and contrasted by the editors, who conjecture what strategies are conducive to success.

Democracy and Education in Namibia and Beyond Jun 27 2019 The Namibian constitution makes full provision for education as a fundamental human right and freedom. Three years into independence, as part of the government's educational policy, the 'Education for All Policy' was launched as a stepping stone to free quality education. However, inequities have become widely pronounced within the Namibian educational system. *Democracy and Education in Namibia and beyond* debates the education-democracy nexus in Namibia and the

southern African context. It defines and explores the meaning of democracy and related concepts. It also looks at what democracy means in the context of human rights and access to education. The ten chapters in this collection interrogate the strengths and limitations of education as an instrument of social change and question whether or not the Namibian educational objectives and practices do develop and help to sustain a democratic culture in Namibia. The authors in the collection have drawn material from their own teaching and research experience across the fields of education and social science in Namibia and beyond, and present their findings in a pedagogical framework suitable as a challenging text for tertiary students. At a time when education is in crisis, especially in South Africa where strident calls for free tertiary education and Africanisation of the curriculum are spreading like wildfire, this book gives scholarly insight into the history and social conditions that gave rise to our current predicament.

his next meal from. Scavenger. Yes you grovel to the feet of Mengistu and when his people spit at you and kick you from the bowl you scuttle across the border. Scavenger. As a violent civil war rages back home in Ethiopia, teenager Alem and his father are in a bed and breakfast in Berkshire. It's his best holiday ever. The next morning his father is gone and has left a note explaining that he and his mother want to protect Alem from the war. This strange grey country of England is now his home. On his own, and in the hands of the social services and the Refugee Council, Alem lives from letter to letter, waiting to hear something from his father. Then he meets car-obsessed Mustapha, the lovely 'out-of-your-league' Ruth and dangerous Sweeney - three unexpected allies who spur him on in his fight to be seen as more than just the Refugee Boy. Making Schools Better for Disadvantaged Students Jan 15 2021 Around the world, governments, charities, and other bodies are concerned with improving education, especially for the lowest-attaining and most disadvantaged students. Making Schools Better for Disadvantaged Students presents detailed research into how poverty affects student segregation and underachievement in schools. It contains the first ever large-scale evaluation of how funding can best be used to lower the

poverty attainment gap for disadvantaged students. Drawing on a wealth of empirical research from England, India, and Pakistan as well as worldwide reviews of relevant studies, the book presents high-quality evidence on the impact of funding policy initiatives, such as the Pupil Premium funding in England, and the many variations of similar schemes worldwide. It analyses education measures which have been put in place and discusses ways in which these can be used efficiently and fairly to allocate funding to students who are persistently at risk of underachievement. The book is unique in synthesising many forms of evidence from around the world and finding a definition of educational disadvantage that can be used fairly across different contexts. Offering significant implications for ways to improve educational outcomes for disadvantaged students, the book will be essential reading for students of education policy, sociology of education and educational practices, and all researchers, school leaders, and policy-makers working in this area.
