*Creating Motion Graphics with After Effects* Sep 29 2022 After Effects CS5.5 Update: [/tv.adobe.com/show/after-effects-cs55-new-creative-techniques/](http://tv.adobe.com/show/after-effects-cs55-new-creative-techniques/) Chris and Trish Meyer have created a series of videos demonstrating how to use their favorite new and enhanced features in After Effects CS5.5. Virtually all of these videos use exercise files from *Creating Motion Graphics with After Effects* (5th Edition for CS5) as their starting point, extending the usefulness of this book for its owners. These videos may be viewed for free on AdobeTV. \* 5th Edition of best-selling After Effects book by renowned authors Trish and Chris Meyer covers the important updates in After Effects CS4 and CS5 \* Covers both essential and advanced techniques, from basic layer manipulation and animation through keying, motion tracking, and color management \* The

downloadable resources are packed with project files for version CS5, source materials, and nearly 200 pages of bonus chapters Trish and Chris Meyer share over 17 years of hard-earned, real-world film and video production experience inside this critically acclaimed text. More than a step-by-step review of the features in AE, readers will learn how the program thinks so that they can realize their own visions more quickly and efficiently. This full-color book is packed with tips, gotchas, and sage advice that will help users thrive no matter what projects they might encounter. Creating Motion Graphics 5th Edition has been thoroughly revised to reflect the new features introduced in both After Effects CS4 and CS5. New chapters cover the revolutionary new Roto Brush feature, as well as mocha and mocha shape. The 3D section has been expanded to include working with 3D effects such as Digieffects FreeForm plus workflows including Adobe Repoussé, Vanishing Point Exchange, and 3D model import using Adobe Photoshop Extended. The print version is also accompanied by downloadable resources that contain project files and source materials for all the techniques demonstrated in the book, as well as nearly 200 pages of bonus chapters on subjects such as expressions, scripting, and effects. Subjects include: Animation Techniques; Layer Management; Modes, Masks, and Mattes; Mastering 3D Space; Text Animation; Effects & Presets; Painting and Rotoscoping; Parenting, Nesting, and Collapsing; Color Management and Video Essentials; Motion Tracking and Keying; Working with Audio; Integrating with 3D Applications; Puppet Tools; Expressions; Exporting and Rendering; and much more.

**Dylan Rides the Sleepy Town Express** Dec 29 2019 This is a story that developed when my second son was born. It started as a bedtime lullaby that I made up to help my infant son Dylan go to sleep when he had colic. As he got older, it became this bedtime story that I tell him every night. Now we would like to share it with all the little ones with the fascination and love of trains and adventure. Please enjoy our story about a boy with a great imagination, who dreams of an exciting adventure on a unique train that has surprises beyond every door!

Algebra and Number Theory Aug 29 2022 Explore the main algebraic structures and number systems that play a central role across the field of mathematics. Algebra and number theory are two powerful branches of modern mathematics at the forefront of current mathematical research, and each plays an increasingly significant role in different branches of mathematics, from geometry and

topology to computing and communications. Based on the authors' extensive experience within the field, Algebra and Number Theory has an innovative approach that integrates three disciplines—linear algebra, abstract algebra, and number theory—into one comprehensive and fluid presentation, facilitating a deeper understanding of the topic and improving readers' retention of the main concepts. The book begins with an introduction to the elements of set theory. Next, the authors discuss matrices, determinants, and elements of field theory, including preliminary information related to integers and complex numbers. Subsequent chapters explore key ideas relating to linear algebra such as vector spaces, linear mapping, and bilinear forms. The book explores the development of the main ideas of algebraic structures and concludes with applications of algebraic ideas to number theory. Interesting applications are provided throughout to demonstrate the relevance of the discussed concepts. In addition, chapter exercises allow readers to test their comprehension of the presented material. Algebra and Number Theory is an excellent book for courses on linear algebra, abstract algebra, and number theory at the upper-undergraduate level. It is also a valuable reference for researchers working in different fields of mathematics, computer science, and engineering as well as for individuals preparing for a career in mathematics education.

*Doing Rapid Qualitative Research* Jan 22 2022 If you are working in a time-sensitive context, need to deliver research findings so they can be used to inform decisions, or are finding it difficult to access research funding for long-term qualitative research, this book will help you. Introducing 'rapid

qualitative research', it demonstrates how you can conduct high quality qualitative research within time, access and resource constraints. The book uses real world examples to illustrate the benefits and challenges of using rapid qualitative research designs. Focusing on the when, why and how, it explains the difference between cutting corners and making quick, well-informed research choices that support rigorous, credible research. Key features of the book include discussion questions and exercises for you to reflect on and apply your learning, as well as two case study chapters of real-world research so you can see rapid research in action. Written by the world's leading expert on this subject, this book contains the theoretical and practical nuts and bolts you need to reframe existing qualitative methods, speed up your research, and make tangible contributions to your field. It is the perfect companion for any researcher, final-year undergraduate or postgraduate student looking to conduct rapid, but rigorous, qualitative research.
