Lucky Strike Jan 13 2021 Nate Harlow would love to be lucky, just once! He'd like to win a prize, get picked first, call a coin toss right, even! But his best friend, Genesis Beam (aka Gen), believes in science and logic, and she doesn't think for one second that there's such a thing as luck, good or bad. She doesn't care what names the other kids call them. She cares about being right, about saving the turtles of Paradise Beach, and she cares about Nate. Then, on his birthday, at the Goofy Golf mini-golf course, Nate is struck by lightning -- and survives! Suddenly baseballs are drawn to his bat--popular kids want HIM on their side. It seems the whole town of Paradise Beach thinks Nate has the magic touch. But is there room for Gen in Nate's lucky new world? Lucky Strike tells the unforgettable story of two vulnerable outsiders and what luck is really all about.

A Dream-Guided Meditation Model and the Personalized Method for Interpreting Dreams Jan 31 2020 A Dream-guided Meditation Model and the Personalized Method for Interpreting Dreams presents a model for meditation that counselors can use with clients regardless of gender, race, national origin, religion, age, or marital status. Using the model, readers can, if they wish, learn to interpret nighttime dreams. Even readers who choose not to learn to interpret their dreams may find that the meditation model assists with dream guidance.

A Tale of Boxes Aug 08 2020 Every one of us lives in a box. This box determines what we see and what we do not see. It tells us who to love and hate. What to fight for. How to live. Who we are. Our boxes -- the collection of stories we tell about ourselves and the world -- create the human drama. Whether you become a pawn in this drama or take control of your destiny depends on the ability to answer two questions: Why is my box the way it is? How can I transform it? By examining the forces that have shaped your most deeply held beliefs, this book challenges you to think outside the box that society has provided for you and begin writing your own story.

Advances in Information Retrieval Jul 27 2019 This book constitutes the refereed proceedings of the 33rd annual European Conference on Information Retrieval Research, ECIR 2011, held in Dublin, Ireland, in April 2010. The 45 revised full papers presented together with 24 poster papers, 17 short papers, and 6 tool demonstrations were carefully reviewed and selected from 223 full research paper submissions and 64 poster/demo submissions. The papers are organized in topical sections on text categorization, recommender systems, Web IR, IR evaluation, IR for Social Networks, cross-language IR, IR theory, multimedia IR, IR applications, interactive IR, and question answering /NLP.

Guided Reflection Jun 25 2019 "...an important text for practitioners...this text is a valuable tool that develops self-inquiry skills." Journal of Advanced Nursing Reflection is widely recognised as an invaluable tool in health care, providing fresh insights which enable practitioners to develop their own practice and improve the quality of their care. Guided Reflection: A Narrative Approach to Advancing Professional Practice introduces the practitioner to the concept of guided reflection, in which the practitioner is assisted by a mentor (or 'guide') in a process of self-enquiry, development, and learning through reflection in order to effectively realise one's vision of practice and self as a lived reality. Guided reflection is grounded in individual practice, and can provide deeply meaningful insights into self-development and professional care. The process results in a reflexive narrative, which highlights key issues for enhancing healthcare practice and professional care. Reflection: A Narrative Approach to Advancing Professional Practice uses a collection of such narratives from everyday clinical practice to demonstrate the theory and practicalities of guided reflection and narrative construction. In this second edition, Chris Johns has explored many of the existing narratives in more depth. Many new contributions have been added including several more innovative reflections, such as performance and art. These narratives portray the values inherent in caring, highlight key issues in clinical practice, reveal the factors that constrain the quest to realise practice, and examine the ways practitioners work towards

overcoming these constraints.

A Radiologically-Guided Approach to Musculoskeletal Anatomy Feb 11 2021 For many healthcare professionals, musculoskeletal diseases represent the "bread and butter" topic after graduation. Therefore, radiological education in respect of the musculoskeletal system is vital in ensuring adequate patient management and cost-effective use of healthcare financial resources. This book illustrates the clinical anatomy of the musculoskeletal system by means of images obtained using commercially available imaging equipment and the three main imaging techniques employed today - magnetic resonance imaging, computed tomography, and ultrasound. Based on an integrated multimodality approach, each anatomical region is presented with a special focus on clinically relevant anatomical details and the characteristic findings observed in patients referred by physicians. With almost 450 images and illustrations, *A Radiologically Guided Approach to Musculoskeletal Anatomy* is intended as a bridge from a standard anatomical atlas to diagnostic imaging. It will assist in the everyday interpretation of imaging studies of the musculoskeletal system, providing prompt answers to frequently encountered questions. Clinical notes and self-assessment modules are also provided. All who wish to learn more about the role of diagnostic imaging of the musculoskeletal system will find this book to be of great value. It will benefit not only medical students and residents but also radiology technologists and professionals in other fields of health care, including orthopaedists, rheumatologists, and rehabilitation specialists. ?

English for Academic Research: Vocabulary Exercises Sep 20 2021 This book is based on a study of referees' reports and letters from journal editors on reasons why papers written by non-native researchers are rejected due to problems with English (long sentences, redundancy, poor structure etc). It draws on English-related errors from around 5000 papers written by non-native authors, around 3000 emails, 500 abstracts by PhD students, and over 1000 hours of teaching researchers how to write and present research papers. The exercises are organized into nine chapters on: adjectives and adverbs (e.g. actual vs current, different vs several, continually vs continuously), link words (e.g. on the contrary vs on the other hand, despite vs nevertheless), nouns (e.g. danger vs hazard, measure vs measurement), prepositions (e.g. among vs between, in vs into, with vs within), verbs (e.g. check vs control, compose vs comprise, arise vs raise, exclude vs rule out), false friends and synonyms, spelling, useful phrases, emails. Nearly all exercises require no actual writing but simply choosing between various options, thus facilitating self-study, e-reading and rapid progress. The exercises can also be integrated into English for Academic Purposes (EAP) and English for Special Purposes (ESP) courses at universities and research institutes. The book can be used in conjunction with the other exercise books in the series: *English for Academic Research: Writing Exercises* *English for Academic Research: Grammar Exercises*

Smart Education and Smart e-Learning Oct 29 2019 This book contains the contributions presented at the 2nd international KES conference on Smart Education and Smart e-Learning, which took place in Sorrento, Italy, June 17-19, 2015. It contains a total of 45 peer-reviewed book chapters that are grouped into several parts: Part 1 - Smart Education, Part 2 - Smart Educational Technology, Part 3 - Smart e-Learning, Part 4 - Smart Professional Training and Teachers' Education, and Part 5 - Smart Teaching and Training related Topics. This book can be a useful source of research data and valuable information for faculty, scholars, Ph.D. students, administrators, and practitioners - those who are interested in innovative areas of smart education and smart e-learning.

Final FRCR Part A Modules 4-6 Single Best Answer MCOS Jul 19 2021 Single best answer (SBA) questions have been introduced into the FRCR Part 2A examination of the Royal College of Radiologists in the UK for the first time. This book of 600 SBA questions and explanatory answers has been written to aid students preparing for the exam by current trainees in clinical radiology, coordinated through The Society of Radiologists in Training (SRT). Questions are grouped by topic and each topic is split into three papers of 70 questions, with explanations separated into chapters to enable readers to either attempt a whole mock exam paper or to browse question by question. The book is a bridge between a pure revision aid and a reference text, including a bibliography of useful references for further information. Candidates for other professional exams in Radiology will find the text useful, as will and those from other specialties wishing to explore the radiological aspects of their syllabus in greater depth. This is a companion volume to *Final FRCR Part A Modules 4-6 Single Best Answer MCQs* by the same team.

The Book of Answers Mar 27 2022 An updated, repackaged edition of the bestselling divination tool and party favorite - ask a yes or no question, open the book, find your answer - with more than a million copies in print. Should you ask your boss for a raise? Call that cutie you met at a party? Sell your Google stock? Tell your best friend her boyfriend's

cheating? The answer to these questions (and hundreds of others) is in this fun and weirdly wise little book that's impossible to put down. It's simple to use: just hold it closed in your hands and concentrate on your question for a few seconds. While visualizing or speaking your question, place one palm down on the book's front and stroke the edge of the pages back to front. When you sense the time is right, open to the page your fingers landed on and there is your answer! Fun, satisfying, and a lot less time-consuming than asking everyone you know for advice. Over 1 million copies in print!

Advances in Questionnaire Design, Development, Evaluation and Testing Nov 22 2021 A new and updated definitive resource for survey questionnaire testing and evaluation Building on the success of the first Questionnaire Development, Evaluation, and Testing (QDET) conference in 2002, this book brings together leading papers from the Second International Conference on Questionnaire Design, Development, Evaluation, and Testing (QDET2) held in 2016. The volume assesses the current state of the art and science of QDET; examines the importance of methodological attention to the questionnaire in the present world of information collection; and ponders how the QDET field can anticipate new trends and directions as information needs and data collection methods continue to evolve. Featuring contributions from international experts in survey methodology, Advances in Questionnaire Design, Development, Evaluation and Testing includes latest insights on question characteristics, usability testing, web probing, and other pretesting approaches, as well as: Recent developments in the design and evaluation of digital and self-administered surveys Strategies for comparing and combining questionnaire evaluation methods Approaches for cross-cultural and cross-national questionnaire development New data sources and methodological innovations during the last 15 years Case studies and practical applications Advances in Questionnaire Design, Development, Evaluation and Testing serves as a forum to prepare researchers to meet the next generation of challenges, making it an excellent resource for researchers and practitioners in government, academia, and the private sector.

Why Priests? Jun 29 2022 When--as we often hear--there are too few priests, can and should lay people assume some part of the priestly ministry? And when all men and women have equal dignity in the eyes of God, is it not also time to organize parishes democratically? Also, why does the Church need priests at all? Just in time for the "Year for Priests," Paul Josef Cardinal Cordes, the president of the Pontifical Council Cor Unum and a close friend of Pope Benedict XVI, offers a wide-ranging view of the priesthood which draws on the Holy Father's thinking and scholarship over a period of fifty years. The book covers four major themes: origins of priesthood, development through the history of the Church, the limitations and problems faced by priests, and finally, personal faith and the Church's salvific means. Through these reflections the Cardinal offers a deeper understanding of the Catholic priesthood which is sure to be helpful for the priest and his parish, the seminarian and his ambience, as well as all those interested in the priestly ministry and the Church's decision-making process.

Image-Guided Percutaneous Spine Biopsy Apr 03 2020 This textbook covers key areas and reviews important principles and steps in the preparation for and the performance of spine biopsy. Image-guided percutaneous biopsy techniques and their application throughout the spinal axis are presented and discussed in detail. The advantages and disadvantages of various spine biopsy instruments are reviewed. Commonly encountered biopsy scenarios are considered in order to help readers effectively manage these situations when they occur in their practices. Clear guidance is offered on patient selection and preparation, which are critical to safe and effective outcomes, and much emphasis is placed on procedural safety, with a focus on complication avoidance and the appropriate reporting of complications. Image-Guided Percutaneous Spine Biopsy will be a welcome one-stop shop providing up-to-date information for all physicians with an interest in the subject, including radiologists, surgeons, and pathologists.

Knowledge Engineering Jun 17 2021 This book presents a significant advancement in the theory and practice of knowledge engineering, the discipline concerned with the development of intelligent agents that use knowledge and reasoning to perform problem solving and decision-making tasks. It covers the main stages in the development of a knowledge-based agent: understanding the application domain, modeling problem solving in that domain, developing the ontology, learning the reasoning rules, and testing the agent. The book focuses on a special class of agents: cognitive assistants for evidence-based reasoning that learn complex problem-solving expertise directly from human experts, support experts, and nonexperts in problem solving and decision making, and teach their problem-solving expertise to students. A powerful learning agent shell, Disciple-EBR, is included with the book, enabling students, practitioners, and researchers to develop cognitive assistants rapidly in a wide variety of domains that require evidence-based reasoning, including intelligence analysis, cybersecurity, law, forensics, medicine, and education.

A Methodology for Developing Multimodal User Interfaces of Information Systems Feb 23 2022 The Graphical User Interface (GUI), as the most prevailing type of User Interface (UI) in today's interactive applications, restricts the interaction with a computer to the visual modality and is therefore not suited for some users (e.g., with limited literacy or typing skills), in some circumstances (e.g., while moving around, with their hands or eyes busy) or when the environment is constrained (e.g., the keyboard and the mouse are not available). In order to go beyond the GUI constraints, the Multimodal (MM) UIs appear as paradigm that provide users with great expressive power, naturalness and flexibility. In this thesis we argue that developing MM UIs combining graphical and vocal modalities is an activity that could benefit from the application of a methodology which is composed of: a set of models, a method manipulating these models and the tools implementing the method. Therefore, we define a design space-based method that is supported by model-to-model colored transformations in order to obtain MM UIs of information systems. The design space is composed of explicitly defined design options that clarify the development process in a structured way in order to require less design effort. The feasibility of the methodology is demonstrated through three case studies with different levels of complexity and coverage. In addition, an empirical study is conducted with end-users in order to measure the relative usability level provided by different design decisions.

Interviewing Sep 28 2019 This book provides guidance to researchers about how to develop interview skills that align with their theoretical assumptions. Connecting "theory" and "method" can be challenging for novice researchers. Interviewing: A Guide to Theory and Practice draws from, and extends, the author's earlier 2010 book, and focuses on three interrelated issues, how researchers: theorize research interviews; examine their subject positions in relation to projects and participants; and explore the details of interview interaction to inform practice. By developing these understandings of qualitative interview practice, Kathryn Roulston shows how researchers can design and conduct quality research projects that draw on a wide range of interview practices to provide audience members and communities with significant findings concerning social problems.
