**Toward a Prosecutor for the European Union Volume 1** Mar 24 2022 In an era in which the EU's influence in criminal law matters has expanded rapidly, attention has recently turned to the possible creation of a European Public Prosecutor's Office. This two volume work presents the results of a study carried out by a group of European criminal law experts in 2010-2012, with the financial support of the EU Commission, whose aims were to examine in detail current public

prosecution systems in the Member States and to scrutinise proposals for a new European office. Volume 1 begins with thorough descriptions of 20 different national legal systems of investigation and prosecution, addressing a range of evidential and procedural safeguards. These will serve as a point of reference for all future research on public prosecutors. Volume 1 also contains a series of cross-cutting studies of the key issues that will inform debates about the creation of a European Public Prosecutor's Office, including studies of vertical cooperation in administrative investigations in subsidy and competition cases, the accession of the EU to the ECHR, judicial control in cooperation in criminal matters, mutual recognition and decentralised enforcement of European competition law. Volume 2 (which will be published in 2013) presents a draft set of model rules for the procedure of the European Public Prosecutor's Office and continues with a set of comparative studies of the national legal systems that cover the gathering of evidence, seizure of assets, arrests, tracking and tracing, prosecution measures, procedural safeguards, the presumption of innocence and the right to silence, access to the file and victim reconciliation. Volume 2 concludes with the final report, written by Professor Ligeti, summarising the findings of the group and reporting on the prospects for the proposed reform.

**Food Control and Biosecurity** Dec 09 2020 Food Control and Biosecurity, Volume Sixteen, the latest release in the Handbook of Food Bioengineering series, is an essential resource for anyone in the food industry who needs to understand safety and quality control to prevent or reduce the spread of foodborne diseases. The book covers information from exporter to transporter, importer and retailer, and offers valuable tools to measure food quality while also addressing government standards and regulations for food production, processing and consumption. The book presents cutting-edge methods for detecting hazardous compounds within foods, including carcinogenic

chemicals. Other related topics addressing food insecurity and food defense are also discussed. Identifies the latest import/export regulations related to food control and biosecurity Provides detection and analysis methods to ensure a safe food supply Presents risk assessment tools and prevention strategies for food safety and process control

*Care in Chaos* Jul 24 2019 "This challenging book focuses on the impact of the recent major 'reforms' in community care. There is growing evidence that the reforms are failing, but a perspective culture of secrecy and conformity in the health and social services prevents practitioners from speaking out openly about what is happening." "In this book, under the protection of anonymity, practitioners from statutory, voluntary and private organizations talk freely about their experiences. Their witness provides a devastating criticism of the way the community care changes have been implemented and of the debilitating limitations imposed on good practice. The authors analyse the fundamental weaknesses in policy revealed in these interviews and propose a positive and realistic alternative." "Care in Chaos will be indispensable for all doctors, social workers, nurses, care workers, carers, managers, policy makers, students and others who are concerned with community care."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc.
